

▲ THE RISK IS REAL

Your Business Is a Target. Are You Protected?

4x

more often SMBs are targeted than large organizations

\$200K+

average cost of a single ransomware attack for SMBs

56%

of small businesses reported ransomware incidents in 2024

38%

year-over-year increase in cyberattacks (Check Point Research)

TOP ATTACK METHODS TARGETING YOUR BUSINESS

Phishing

Fake emails trick users into revealing credentials

Ransomware

Encrypts your files and demands payment

BEC Fraud

Impersonates executives to redirect payments

Account Takeover

Stolen credentials used to access your systems

Malware

Malicious software infiltrates through email & web

2 Weeks Free Trial — See What's Slipping Past Your Defenses

Managed Email Security

\$8 /user/month

AI-POWERED PROTECTION FOR MICROSOFT 365 & GOOGLE WORKSPACE. LICENSE + MANAGED SERVICE INCLUDED.

WHY YOU NEED THIS

90% of cyberattacks start with email. Microsoft 365 and Google catch the obvious stuff — but AI-generated phishing has a **54% higher click rate** than human-written attacks, and the average ransomware demand for an SMB starts in the six figures. One clicked link is enough.

WHAT IT DOES

- **Stops AI-crafted phishing & BEC:**
reads tone, intent, sender history
- **Safe attachments in <2 sec:**
clean version delivered, business keeps moving
- **Account takeover detection:**
flags impossible logins & unusual behavior
- **Sandbox malware detection:**
detonates suspicious files before delivery
- **Click-time link protection:**
re-checked when user clicks, not just at delivery
- **Day-one inbox scan:**
finds threats already sitting in mailboxes

99.91%

malware catch rate (NSS Labs)

99.2%

fewer phishing emails reach inbox

5 min

to deploy — no MX changes

HOW WE PROTECT YOUR BUSINESS — 24/7

1

Watch

24/7 monitoring across email & every endpoint

2

Detect

AI flags threats — often before payload delivery

3

Contain

Auto-block, isolate, & remove threats in seconds

4

Report

Monthly reports + immediate incident notifications

Managed Endpoint Detection & Response

\$8 /endpoint/month

AI-DRIVEN PROTECTION FOR LAPTOPS, DESKTOPS & SERVERS. LICENSE + MANAGED SERVICE INCLUDED.

WHY YOU NEED THIS

Antivirus alone won't save you. 70% of attacks start on an endpoint — a laptop, desktop, or server. Once ransomware is running, you have minutes, not hours. EDR watches behavior 24/7, blocks attacks the moment they start, and rolls back damage automatically.

WHAT IT DOES

- **Real-time ransomware blocking:**
AI + chip-level (Intel TDT) detection
- **Behavioral attack detection:**
catches threats that look like normal apps
- **Incident hunting & forensics:**
full attack timeline, no guesswork
- **Automatic file recovery:**
restores encrypted files from secure snapshots
- **Stops bot infections & C2 traffic:**
blocks compromised devices from phoning home to attackers
- **Cross-platform coverage:**
Windows, Mac, Linux, servers, remote devices

Average org now faces 1,150 attacks per week. Real protection means real-time prevention, automated containment, and a team who reads the alerts so you don't have to.

★ **BEST VALUE** **COMPLETE PROTECTION**

Email + Endpoint Bundle

\$14 /user/month

Most attacks don't stay in one place. A phishing email leads to a malicious download. A compromised laptop sends fraudulent emails. The bundle connects email and endpoint signals so we catch the full attack chain — not just one piece of it.

- Everything in Managed Email Security
- Cross-platform threat correlation
- Everything in Managed EDR
- One dashboard, one report, one contact

WHEN YOU BUNDLE, YOU ALSO GET:

- ★ **One vendor, one bill:** no juggling multiple invoices or contracts
- ★ **Single point of contact:** no finger-pointing between vendors during incidents
- ★ **Unified dashboard & reporting:** one monthly report covering email + endpoints
- ★ **Less staff coordination:** your team works with one team, not two

Optional Add-Ons

Browser Security &
Web Filtering
\$3/user/mo

Security Awareness
Training
\$2/user/mo

Dark Web Monitoring
(Leaked Credentials)
\$2/user/mo

Why choose cAlberOps?

- ✓ Same tech as Fortune 500 — at SMB pricing
- ✓ Free onboarding — no setup fees, no hidden costs
- ✓ Local to the DMV — serving VA, DC & MD
- ✓ Up to 33% cheaper than competitors using identical products
- ✓ Annual or month-to-month — no multi-year lock-in
- ✓ Built for small & medium businesses
